Is the University of Murcia able to receive students from other subject areas instead of the ones agreed on the Bilateral Agreement? Is there a possibility of taking courses from different faculties/departments?	We will not be able to accept your students or to appoint a tutor for them if they do not come from the fields stipulated in our bilateral agreements. Of course, we are flexible and students can enrol in any extra subjects they wish within the main subject area.
In case we agreed one student for the whole academic year, is the University of Murcia able to receive two students for one semester each instead?	It depends on the academic tutor.
Are students from other universities required to have determined language skills in our language?	We advise all partners to nominate students complying with the Spanish language requirement
